VTL-E Open cooling towers

Key benefits

- Low height
- Easy installation
- Quiet

VTL-E characteristics

Counter flow, centrifugal fan, forced draft

Capacity range

3 - 130 l/s

Water distribution

Pressurized

Maximum entering water temperature

55°C standard fill 65°C with alternative fill

Typical applications

- Small to medium HVAC and industrial applications
- Installations with extremely low height requirements
- Indoor installations
- High temperature industrial applications
- Tight enclosures & installations requiring a single air inlet

BA

Low height

• Very low height: fits perfectly on roof tops or tight enclosures.

Easy installation

- VTL-E towers are factory-assembled. We ship in **one piece** for **easy on-site lifting and installation**.
- VTL-E offers high capacity and minimum operating weight. Save on steel supports, both underneath the
 equipment and in the building itself for rooftop installations.
- Single-side air inlet lets you install next to solid walls.
- Units housable indoors thanks to centrifugal fans allowing intake or discharge ductwork.

Ideal for a quiet operation

- VTL-E units include quiet internal centrifugal fans for minimal surrounding noise.
- Single-side air inlet, and a **quieter tower rear** for more noise-sensitive areas.
- Cut operation noise still further with factory-designed and tested <u>sound attenuators</u> or silencers.

Year-round reliable operation

- Various corrosion-resistant materials, including the unique <u>Baltibond[®] hybrid coating</u> for guaranteed long service life.
- Optional <u>Baltiguard[®] Drive System</u> for energy savings and less noise during low load (night). A perfect stand-by system in case of motor failure.
- The thermal performance of VTL-E is <u>Eurovent certified</u>.

Easy to maintain

- Easy access to all the mechanicals, including fan shaft bearings.
- <u>BACount</u> individual bundled fill sheets for easy and complete inspection or cleaning preventing full replacement of fill bundles.

Interested in the VTL-E cooling tower for cooling your process water? Contact your local <u>BAC</u> representative for more information.
