

Water distribution

Spare parts guide

Key benefits

The water distribution system features:

1. [Nozzles](#)
2. [Spray branches](#)
3. [Spray pump](#)
4. [Strainer](#)
5. [Make-up](#)
6. [Pump piping](#)

Each component of the water distribution system has passed a **longevity and quality test** in our [R&D laboratories](#). These parts are exclusively selected, designed or even patented, meeting **very strict technical specifications**.

That's why you best choose original BAC spare parts when replacing components from the water distribution system. This assures original performance and a year round reliable operation of your BAC cooling equipment.

Need replacement parts for the water distributions system of your BAC cooling equipment? Contact your [local BAC representative](#) for help.
