

# Adiabatic cooling

## **Options and Accessories**

Below is a listing of the main TRC options and accessories. If your required option or accessory is not listed, look no further than your <u>local BAC representative</u>.

Increase the coil's resistance against a harsh atmosphere.

Reducing noise at air **intake and discharge points** brings us closed to silent cooling equipment.

Increase the degree of redundancy, providing a higher backup capacity for your installation.

The recirculation pump helps to further cut down on water consumption.

This option integrates the adiabatic cooler's control system in your BMS system.

#### **Motor removal davit**

For **easy removal or lifting** of the side motor.

### **Coil connection duct plenum**

Allows a connection between the unit and a nearby structure.

### Ladder

A ladder to **facilitate access to the top of the unit** and safe inspection of your condenser.

Cuts power to motor with **safety in mind** during inspection or maintenance.

#### **Sealed bottom**

The sealed bottom captures fluids and evacuates them.
